SMART SWITCH - SINGLE FUNCTION

DESCRIPTION

The Single-Function Smart Switch provides simple user interfacing for either scene or zone control of a room. On/off and multi-step commands are available by utilizing a single button. The momentary actuated Decora® type switch provides positive feedback to the user when pressed. Smart switches communicate on Touché's SmartNet making the incredibly simple to setup.

FEATURES

- Simple momentary contact switch provides on/off and multi-step control.
- Device is part of Touché's auto-addressing network of devices, requiring no dip-switch set-up.
- SmartNet device that connects to the network via simple CAT5 cable. Power to the device is via the same CAT5 cable.
- Each switch is software configurable and can be configured in the programming application or wirelessly in the smart phone application.
- Daisy-chaining devices provides three and four-way switching functions in a room or area without software configuration.
- Switches fit into standard 1-gang electrical junction box configurations (4" sq. box with plaster ring or masonry box). Ganging of multiple switches can be done without any special rough-in considerations.
- The required faceplate (not included) is a standard Decora® wall-plate.
- Out-of-the-box configured as a scene wall station.
- Available in five standard colors:

| WHITE | LGT ALMOND | IVORY | GRAY | BLACK |
