

PRODUCT DATA SHEET

TOUCHÉ CONTROLS

OCCUPANCY SENSOR / 0-10V DIMMER SWITCH

DUAL TECHNOLOGY SHOWN

DESCRIPTION

Occupancy sensor switches provide stand-alone detection of occupants for small, high movement areas (small offices, huddle rooms, etc.). This configuration provides 0-10V dimmable controls for loads with compatible input.

FEATURES

- A 0-10V proportional output provides dimming control for ballasts and drivers with compatible input.
- These switches are low cost alternatives for areas that do not require integration with the rest of the lighting control system.
- Dual technology (PIR + ultrasonic).
- Occupancy (Auto-On) and Vacancy (Manual-On) operating modes.
- These switches include an integral on/off override button, raise button and lower button on the face of the switch for manual control and level set-point.
- Built-in photo-sensor for automatic daylight harvesting.
- Zero-Cross switching control for improved contact life.
- Time delays are adjustable from 4 to 30 minutes.
- Self-adaptive feature automatically adjusts time delay based on occupant behavior patterns.
- Occupancy coverage is 1,000 sq. ft. — 180 degrees.
- The required faceplate (not included) is a standard Decora® wall-plate.
- Available in three standard colors:

WHITE

IVORY

GRAY
