

PRODUCT DATA SHEET

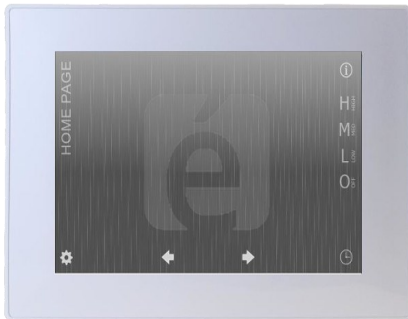

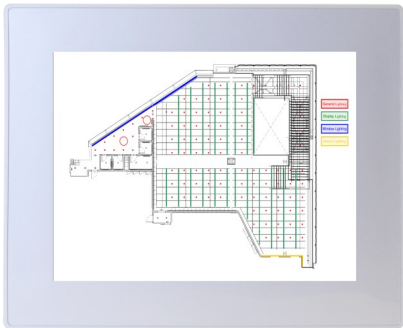

TOUCHÉ CONTROLS

TOUCHSCREEN USER INTERFACE

DESCRIPTION

Touch Screen User Interfaces are color touch screen computers that provide custom graphical user interfacing at a non-custom price.

FEATURES

- Displays are available in two configurations:
 - 7" TFT 800x480 WVGA, color display.
 - 10.4" TFT 800x600 SVGA, color display.
- Displays include internal flash for local storage of graphic pages.
- Displays are built to industrial standards with a clean, screwless bezel.
- Twin Ethernet ports with switch capabilities allow for simple and cost effective daisy-chained wiring structure.
- When a TSUI is connected to a customer's wireless network, the TSUI is able to serve up web pages for up to four tablets or smart phones simultaneously.
- The TSUI can be programmed with a lock-out and a sleep mode.
- Custom Graphics at a non-custom price. Touché provides custom graphics solutions with background images and controls that match each customer's needs and preferences.
- Custom graphics doesn't have to mean the Engineers at Touché have to be called every time a change is desired. The TSUI displays provide the customer a configuration and programming method similar to the rest of Touché's solution that is simple to modify without factory assistance.
- The initial development and implementation of the graphics is included with each TSUI display.

SPECIFICATIONS

POWER SUPPLY VOLTAGE	24VDC - SOURCED FROM NEAREST MASTER INTERFACE
CONNECTIVITY	CAT5 (MINIMUM) + 18/2
LISTINGS	WJCT.E31788
AMBIENT TEMPERATURE	40C (104F)
MAXIMUM HUMIDITY	10 - 90%, NON-CONDENSING

CATALOGUE NUMBER

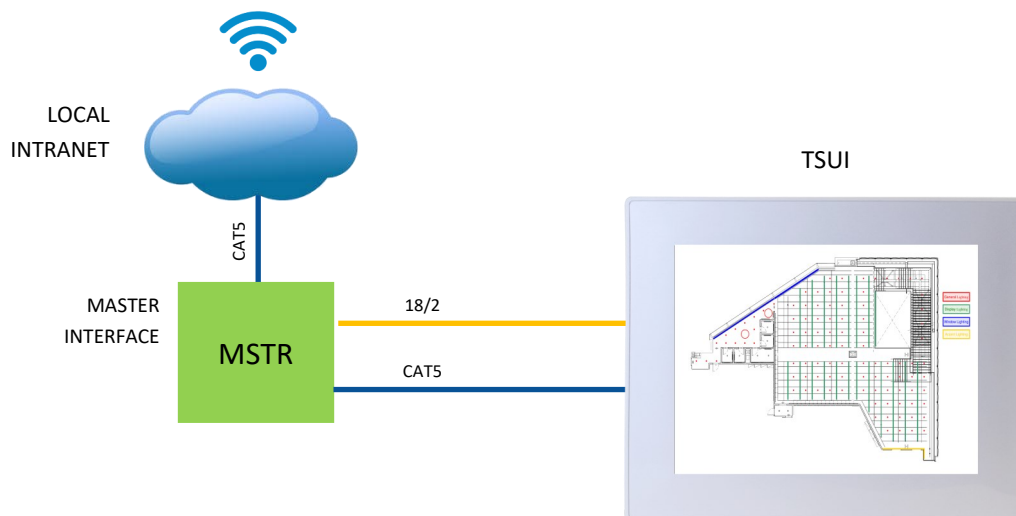

DEVICE TYPE	INTERFACE TYPE	DISPLAY	BEZEL COLOR
TSUI Touchscreen User Interface	WM Wall Mounted (Flush)	7.0 7" Diagonal	W White
		10.4 10" Diagonal	B Black

CONNECTIVITY

CELL PHONES, TABLETS, AND
COMPUTERS NOT INCLUDED

- TSUI displays each include dual Ethernet ports that act as a network switch allowing displays to be daisy-chained directly from the Master Interface or from any network access point that is connected to the Master Interface.
- Power for the TSUI displays originates from the closest Master Interface (KIT-TSUI-PS required and sold separately). Up to three TSUI displays can be sourced from each interface.
- With a wireless connection to the Master Interface, each TSUI is capable of supporting up to four web browsing devices like tablets, smart phones, and laptop computers.
