TOUCHÉ CONTROLS

WALL STATION—COLOR MINI

WS-C-MINI

DESCRIPTION

The WS-C-MINI is a configurable wall station with a color, capacitive touchscreen display. This wall station utilizes a high resolution backlit display for easy-to-read button labels and zone information.

This device supports both scene and individual zone control with a modern form factor.

Display

- 2.4 TFT display, 340x320, premium brightness, 16.7M colors.
- Capacitive multi-touch interface with multi-page capability.
- Dimmable backlight, with sleep-mode capability.

Control & Communication

- Control power and communication is achieved with low voltage CAT5 daisy-chained cable. No additional cabling or sources of power are required.

Switches fit into standard single-gang electrical junction boxes with a standard Decora wallplate (junction box and wallplate not included)

FEATURES

Advanced Scene & Zone Control

- Scene configuration options include 2-button, 3-button, 4-button, and 5-buttons. A scene raise/lower option is available when utilizing 2 through 4-button configuration.
- Capable of supporting up to 4 zones of individual zone control, displayed on a secondary page.
- Scene/Zone indication and control can be hidden when not desired.
- Press-and-hold function for simple, current shown preset saving capability.
- Button text is user configurable when utilized with the Room Manager.

WS-C-MINI features optional 4-digit passcode security feature to ensure that the wall station is only accessed by the intended users.
